

The diagram illustrates a 4x4 MIMO system. On the left, a 4x1 antenna array is labeled '1496' and '1x'. It is connected to a switch labeled '2155'. On the right, two 'Televes' antennas are shown, each labeled '7570' and '4x'. Each antenna is connected to a switch labeled '2155'. The two switches are connected to a common output line labeled '2155'.
